

**An Israeli
company guided
by international
knowhow and
experience**

Your best partners under the sun

Inbar Solar Energy is a leader in design, installation and maintenance of solar power systems in Israel.

The company's vision is to implement profitable renewable energy solutions that address social, industrial, agricultural and urban development needs.

Areas of activity:

Medium size solar plants (up to 12MW)

The leading EPC in Israel for Medium size plants, offering a bankable EPC agreement at a competitive price.

Commercial systems (up to 50KW)

Broad experience and expertise in optimal design for maximized production for up to 15% higher output than planned for.

Operation and Maintenance agreement for maximized power production

Professional monitoring, prompt troubleshooting, quick response from support team, periodic servicing and panel cleaning to ensure the system's maximized power production.

Advanced system check for solar power systems

Professional objective diagnosis using technologically advanced tools to analyze and recommend solutions for consistent and maximized power production over time.

Inbar is committed to providing its customers with the highest standards. Inbar follows customers through from system purchase to all phases of licensing, and supplies an economic and technological assessment for maximized return on investment. The system is designed by the market's leading team of engineers, installed by professional technicians, and maintained without compromise.
